

# Download Getting Started With Citrix® Provisioning Services 7.0

Hi Carl, Hope you are doing fine. I have setup a 7.15 LTSR CU3 citrix farm with PVS, we have a created a Vdisk , but the client requirement is to have an additional Drive N of 10GB to be part of the Vdisk/image how do we go about doing it?About Bart Jacobs. Bart Jacobs is a Senior System Engineer/Consultant based in Belgium. He started his career back in 1998. One of the first projects he worked on in those days was Citrix Metaframe 1.8 on Microsoft Windows NT 4 Terminal Server codename "Hydra".Hello (Sorry I do not speak English) I read your article your blog. I have several questions about an upcoming migration. Today we are in Xenapp 6.5 / 2008R2 (15 CTX servers) and a profile server (2008r2) for Windows GPO roaming profiles (with folder redirection)In this article, Google Chrome on Citrix deep-dive, I will show you how to deploy and configure Google Chrome on Citrix. Using a comprehensive PowerShell script we will automate the unattended installation and some initial configuration for Chrome., Getting Started With Citrix® Provisioning Services 7.0.
