

# Download Keep Your Bonsai Alive Well

In this section we are going to talk about a very important subject: bonsai care. There are many ways to grow a bonsai: From seed, getting a prebonsai (which is a germinated tree on its early stage), or buying a full grown miniature tree. Come to see us at the SBA National Exhibition and at Gardening Scotland. Meet our members and see our bonsai trees, both of these major bonsai events are well attended by Scottish bonsai enthusiasts, bonsai experts and members of the public. Feeding. Fertilize your Brush Cherry bonsai once every two weeks during the growing season, spring until fall. We recommend using an organic liquid fertilizer such as a fish emulsion or an organic seaweed fertilizer. Growing Moss. Growing moss on your bonsai tree can be very difficult. However, once you've established moss on your bonsai tree, it can grow abundantly and can also be used for transplanting to other bonsai trees., Keep Your Bonsai Alive Well.
